Blue jays are medium-sized birds, about the size of a robin. They have a distinctive blue plumage, with a white or pale blue belly. Their heads are crested, and they have a black mask around their eyes. Their wings are long and pointed, and their tails are long and square.

Blue jays are intelligent and vocal birds. They are known for their raucous calls, which can be heard throughout the day. Blue jays are also very

curious and playful birds. They often engage in playful behavior, such as chasing each other through the trees or playing with objects.

Blue jays are aggressive and territorial birds. They will defend their territory from other birds, and they will often mob predators that come too close to their nests. Blue jays are also very protective of their young. They will often attack predators that come too close to their nests, and they will even feign injury to distract predators from their young.

Blue jays are omnivorous birds. They eat a variety of foods, including acorns, nuts, seeds, insects, small animals, eggs, and young birds. Blue jays are also known to eat the eggs and young of other birds.

Blue jays build their nests in trees. The nests are made of twigs, leaves, and other materials. Blue jays typically lay 3-5 eggs, which are pale blue in color. The eggs are incubated by both the male and female blue jay for about 12 days. The chicks hatch and are cared for by both parents for about 4-5 weeks.

Blue jays are a beautiful and fascinating bird. They are a common sight in North America, and their raucous calls can be heard throughout the day. Blue jays are intelligent and vocal birds, and they are also very curious and playful. They are aggressive and territorial birds, and they are very protective of their young. Blue jays are omnivorous birds, and they eat a variety of foods.
