Pioneering Interventional Cardiology

After completing his residency, Bartner joined the faculty at Massachusetts General Hospital. It was here that he began to develop innovative techniques for treating heart disease without open surgery. In 1986, he performed the world's first successful coronary angioplasty, a procedure that widens narrowed arteries in the heart. This breakthrough paved the way for a new era of minimally invasive cardiac care.

Bartner's work had a profound impact on the field of cardiology. He developed numerous other groundbreaking techniques, including laser atherectomy, rotational atherectomy, and stenting. These procedures have revolutionized the treatment of heart disease, reducing the need for open surgery and improving patient outcomes.

International Recognition

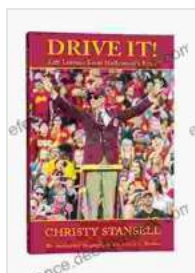

Bartner's contributions to cardiology have been recognized worldwide. He has received numerous awards and honors, including the prestigious Lasker Award for Clinical Medical Research. He has also been inducted into the National Academy of Sciences and the American Academy of Arts and Sciences.

Bartner has served as president of the Society for Cardiovascular Angiography and Interventions and the American Heart Association. He is also a member of the editorial boards of numerous medical journals.

A Legacy of Innovation

Dr. Arthur Bartner's legacy will continue to inspire generations of cardiologists to come. His unwavering commitment to innovation and patient care has transformed the treatment of heart disease. His pioneering work has saved countless lives and improved the quality of life for millions of people around the world.

Dr. Arthur Bartner is a true pioneer in the field of cardiology. His innovative techniques and unwavering commitment to patient care have had a profound impact on the lives of countless people around the world. This authorized biography tells the story of his remarkable career and serves as an inspiration to all who seek to make a difference in the world.
